

# Canescool®

Intimate  
Care

## Soothing Cream Gel

- For instant cooling and care of your sensitive intimate area
- Provides a soothing sensation and moisturises the intimate area

Dermatologically tested  
With glycine and oatmeal

### What is Canescool® and when should it be used?

The refreshing effect of the unique Canescool® formula brings a new dimension in the care of the intimate area.

Canescool® has been specifically developed for the care of the sensitive intimate area. Through its specific gel-in-oil formulation and selected ingredients, Canescool® provides not only an immediate cooling, but also provides a soothing sensation and moisturises the sensitive intimate area.

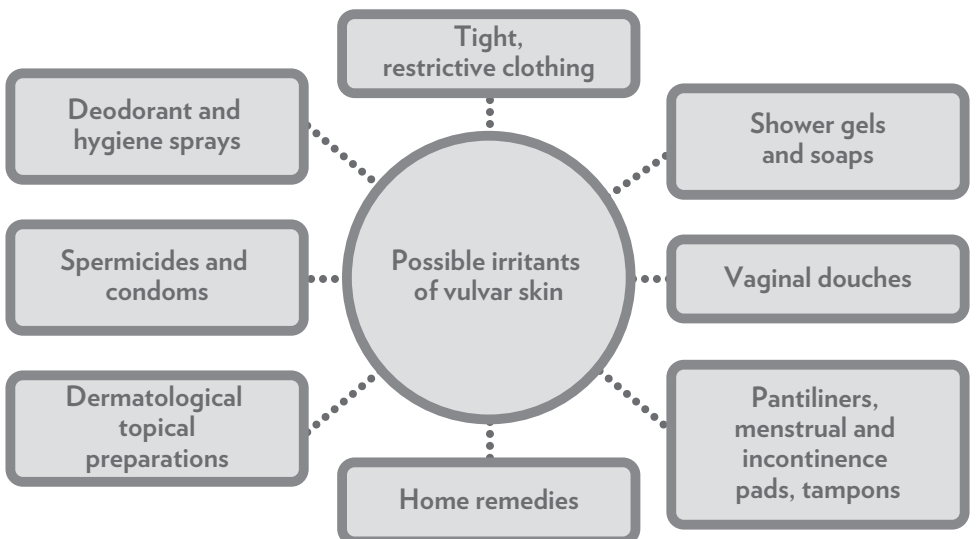

### Why is the intimate area so sensitive and prone to irritation?

Many women occasionally experience irritation of their intimate area, making them feel uncomfortable. These sensations may have different causes such as, using shower gels or soap, wearing tight or synthetic clothing, and also menstruation and hormonal imbalance.

There are many reasons for this:

- The skin on the vulvar area is different to that of the rest of the body.
- The surface pH of vulvar skin is approximately 6, compared with the skin on the forearms (approximately pH 5) for example.
- Further restriction by clothes.

### Possible irritants of vulvar skin:

## How does Canescool® help to calm the sensitive intimate area?

Canescool® helps to calm the sensitive intimate area. Through its specific gel-in-oil formulation and selected ingredients, Canescool® provides not only an immediate cooling, but also provides a soothing sensation and moisturises the sensitive intimate zone.

Canescool® contains:

- Frescolat® X-Cool, a well-tolerated derivative of menthol, known for its immediate and pleasant cooling effect
- Glycine, a naturally occurring amino acid with moisturising properties
- Oatmeal extract, a soothing ingredient of natural origin.

## How to use Canescool®?

Canescool® can be applied as needed to help to calm and refresh the sensitive intimate area prone to irritation. Canescool® is to be applied externally on the vulva. Do not rinse off with water.

## Do not use Canescool®:

If you are sensitive to any of the ingredients in the product.

## What precautions should be noted?

Canescool® is safe to use, however some people might experience burning, discomfort and irritation or worsening of any of these after application of the product. If you experience these symptoms, discontinue use.

Do not store above 30°C.

## What other points should be noted?

Canescool® is:

- Hypoallergenic
- Fragrance free
- For external use only
